AT compatible device

With the integration of a large 50" to 90" HDTV flat screen, the patented E-Board Series 5 is a very adaptable, ergonomically engineered device that's mobile, compact, and extremely versatile.

■ E-Board™ Series 5 Features / Benefits:

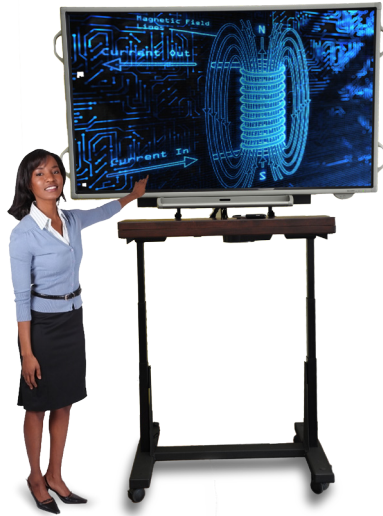

- RF wireless handset for actuator movements
 - Height adjustments with powered vertical movement from 28" through 55" at mantel
 - Flat Screen with powered angular (tilt) movement with 15° front tilt and 5° back tilt
- Engineered for ease of movement
 - Footprint area: 33" D x 43"W (not including Flat Screen)
 - Swivel twin wheel casters allow for ease of mobility (four-wheel locking for increased stability)
 - Approximately 325 Lbs. w/o flat screen and computer, etc.
- Stained wood storage box mantel (for wireless handset, user manual, accessories, etc.)
- Frame color: Matt black on all surfaces
- Integrated tubing electrical enclosures for cables and cords, eliminating clutter
- Uninterruptible Power Supply (UPS) for surge protection and battery backup
- Mounting support for UPS, computer(s) and other peripherals (a patented design feature allowing for single sourced power)
- Universal Mounting Plate for 50" to 90" Flat Screen with VESA (MIS) standard patterns (maximum flat screen weight: 250 lbs.)
- Video cable (HDMI or Display Port)
- Easy to understand user manual (minimal assembly required - fasteners and allen wrenches included for flat screen mounting)
- Standard power specifications of 60 Hertz (50 Hertz if applicable)
- Controller is programmable for actuators (provides customizable height and tilt adjustment range control – contact Widget Works, LLC for details)
- E-Board Limited Warranty for two (2) years from the date of purchase

Chassis does not include related flat screen or computer

The E-Board Series 5 patented design brings a whole new level of highly effective instructional capabilities to every classroom and presentation environment. The Series 5 E-Board is a very adaptable, ergonomically engineered device with a wide range of vertical and tilt movement. Its unique design offers an interactive functionality that readily adapts to multiple user and viewer needs and preferences.

E-Board Series 5 pictured with a Sharp 70" Aquos Touch Screen Display

Versatility in Motion

- Enriched presentation device
- Interactive teaching aid
- Enhanced user collaboration

Interactive Functionality

- Multiple application windows
- Adjustable user interface
- Transportable

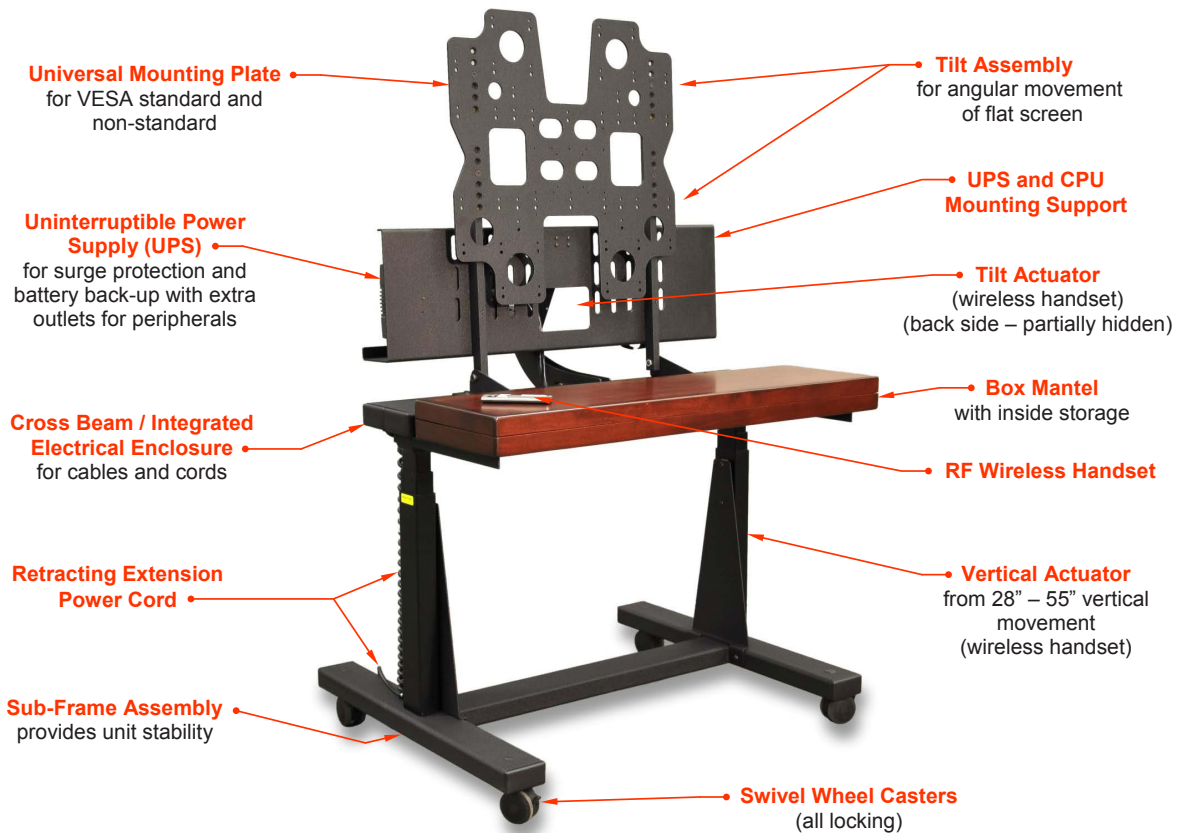

Ergonomically Designed

- User adjustable tilt screen
- User adjustable mantel and screen height

Assistive Technology

- Custom Wheelchair Accessibility
- Enhanced user independence
- Enhanced user vision aid

U.S. Patent No. 7,640,866
